

## Freshcare Crop List (29/03/2021)

The Freshcare Crop List outlines the scope of certification for the Freshcare Standards, including crops/produce and business activities. The Freshcare Crop List provides a reference guide for participating Freshcare businesses, stakeholders and customers to verify the scope of certification on Freshcare Certificates.

This list is managed by Freshcare with updates communicated to stakeholders and made available on the Freshcare website [www.freshcare.com.au/resources/freshcare-crop-list](http://www.freshcare.com.au/resources/freshcare-crop-list).

Any questions related to the Freshcare Crop List should be directed to Freshcare [info@freshcare.com.au](mailto:info@freshcare.com.au).

### Freshcare Certification

Freshcare certification covers businesses involved in primary production activities. This includes the growing, handling, packing, storage, ripening, fumigation, wholesaling, brokerage, transport and distribution of fresh produce.

### Freshcare Standards

Freshcare Standard	Code	Scope	Notes
Food Safety & Quality	FSQ	Grower Packer	
Supply Chain - Food Safety & Quality	FSQ-SC	Packer Storage Ripener Fumigation Transporter Wholesaler Broker Providore Marketing Group	Packer includes packing, pre-pack and re-pack activities.
Environmental	ENV	Grower Packer Wild Harvest	Wild Harvest is applicable to the Flowers and Foliage scope category only.
Sustainability – Viticulture	AWISSP-VIT or ENV-VIT	Grower	Applicable to wine grape production only.
Sustainability – Winery	AWISSP-WIN or ENV-WIN	Winery	Applicable to wine production only.

### Scope: Activities

Scope Activity	Notes
Broker	Includes businesses involved in facilitating trade of fresh produce between a supplier and a customer that do not take physical ownership or physically handle the produce. Freshcare defines 'brokers' to also include agents and virtual brokers.
Grower	Includes businesses involved in production and harvest of a crop, pre-farm gate.
Marketing Group	Includes businesses involved in facilitating the marketing and trade of fresh produce between a supplier and a customer.
Packer	Includes businesses involved in receiving, handling, packing and re-packing of fresh produce (does not include further processing of whole products).
Providore	Includes businesses involved in the procurement of fresh produce for distribution or resale to the food service industry.
Ripener	Includes businesses involved in controlled atmosphere ripening of fresh produce.
Fumigation	Includes businesses involved in fumigation of fresh produce.

<b>Storage</b>	Includes businesses involved in the retention, storage (including controlled atmosphere storage) and warehousing of fresh produce.
<b>Transporter</b>	Includes businesses involved in the collection, transport and distribution of fresh produce. Transportation and distribution includes the direct transfer of products from one business, vehicle or container to another; undertaken via road, rail, air or ship.
<b>Wholesaler</b>	Includes businesses involved in the procurement, handling and wholesale sale of fresh produce.
<b>Wild Harvest</b>	Includes businesses that undertake sustainable wild harvesting of flowers and foliage not intended for consumption as food.
<b>Winery</b>	Includes businesses involved in the production of wine.

## Scope: Categories

Category	Notes
<b>Fresh Produce</b>	Fresh produce supplied to the fresh market.
<b>Fresh Produce for Processing</b>	Fresh produce supplied to the processing sector. Does not include further processes such as freezing, drying, pickling, canning, cook-chill, juicing, slicing/shredding/coring, etc.
<b>Coffee</b>	Coffee crop only. Does not include further processes such as drying, roasting, etc.
<b>Flowers and Foliage</b>	Flowers and foliage destined for the fresh market. Includes edible flowers.
<b>Fodder Crops</b>	Fodder crops destined for use as animal feed.
<b>Nut In Shell</b>	Nuts supplied as nut in shell. Does not include further processes such as shelling, cracking, etc.
<b>Olives</b>	Olive crop only. Does not include further processes such as brining or the production of olive oil.
<b>Reef Assured</b>	Queensland Reef Protection Regulations compliance for Environmental Certification. Currently applicable to Banana Cultivation at February 2021.
<b>Seedlings</b>	For the production of seedlings.
<b>Spices</b>	Spice crop (fresh plant material) only. Does not include further processes such as drying, crushing, etc.
<b>Tea</b>	Tea crop only. Does not include further processes such as drying.
<b>Wine Grapes</b>	Wine grapes category is applicable to Freshcare Environmental or AWISSP Viticulture and Freshcare Environmental or AWISSP Winery Standards only.

The corresponding scope 'Category' on Freshcare Certificates must be selected in accordance with the Freshcare Crop List, e.g. if Saffron is added, then Spices is also selected as a Category.

## Exclusions to Scope:

- **Fruit and Vegetables**

Products of the following nature are **NOT** covered under the scope of Freshcare certification. This is not an extensive list however, and if you are unsure, then please contact Freshcare or your Certification Body for assistance.

- Product that is considered cut, and packed – such as half cabbage, half pumpkin etc.
- Prepared and Packed as Ready to Cook (corn cobbettes, diced vegetables, cauliflower rice, zucchini shreds etc) and there is no further consumer preparation apart from cooking.
- Semi processed vegetables – such as peeled onions, celery sticks, sliced mushrooms.
- Any bagged salad/ mixed green cut fruit and vegetables (apple slices, carrot sticks) product where the consumer could reasonably expect that it is ready to eat.

- **Dried Fruit**

The scope of Freshcare certification covers the production of fresh produce and does not include further activities involved in the production of dried fruit.

Businesses that produce Currants, Raisins and Sultanas may list Table Grapes; those producing Prunes may list Plums.

- **Sprouts**

Freshcare does not cover the production of Sprouts with the exception of Snow Pea Sprouts grown in soil/growing medium and supplied to market as young pea shoots. Snow Pea Sprouts are covered under Microgreens.

See Category: *Fresh Produce, Fresh Produce for Processing > Other > Microgreens.*

### Scope: Crop/Produce

Crop/Produce	Notes
<b>Crop/Produce Group</b>	Crop/Produce as they appear on Freshcare FSQ-SC Certificates.
<b>Crop/Produce</b>	Crop/Produce as they appear on Freshcare FSQ, ENV, ENV-VIT/AWISSP-VIT, ENV-WIN/AWISSP-WIN Certificates.

### Crop Groups

Please note that individual crops should still be recorded in the documents and records used to demonstrate compliance to the Freshcare Standards. Audit reports should also list individual crops against the scope of the business.

### Crop Groups on Freshcare FSQ and ENV Certificates

Where a Freshcare certified business have many produce lines within these groups, they may choose to have an over-arching crop group on their certificate rather than listing each individual crop. For instance, herb growers who produce many produce lines may choose to have Herbs - Hard Leaf and Herbs - Soft Leaf listed on their Freshcare Certificate rather than each produce line.

There are four Crop Groups in the 'Crop/Produce' column. This includes Asian Vegetables - Leafy, Asian Vegetables - Melons, Herbs - Hard Leaf and Herbs - Soft Leaf.

### 'Other' Crop Labels

There are a number of crops listed as 'Other' e.g. Berries - Other. This includes Berries, Citrus, Exotic Fruit, Melons and Stone Fruit. This label is for crops that are not already listed individually in the corresponding Crop/Produce Group. These crops will appear on Freshcare Certificates as *Crop - Other*. Examples of what these may include have been added to the Notes column.

### 'Baby' Lines

Baby lines are not listed individually in the Crop List unless the crop poses a different food safety risk to its full-sized equivalent. 'Baby' crops should be listed as its full-sized equivalent.

### Microgreens

Microgreens refer to young plants grown in a soil/growing medium. This includes those harvested after sprouting as shoots as well live plants in a soil/growing medium.

See Category: *Fresh Produce, Fresh Produce for Processing > Other > Microgreens.*

## Adding scope to current Freshcare Certification

Between recertification audits, changes to the scope of Freshcare certification including categories, crops/produce groups and sites will be reviewed by the Certification Body using a risk-based approach to determine if there is a need for a scope extension audit. *This can be conducted either on site or remote (as per R3) at the discretion of the Certification Body.*

Please refer to the Freshcare Rules for further information.

## Freshcare Crop List

Crops are set out under the following tables as:

<b>Crop/Produce Group</b>	<b>Crop/Produce</b>	<b>Notes</b>
<b><i>Crop/Produce as they appear on Freshcare FSQ-SC Certificates.</i></b>	Crop/Produce as they appear on Freshcare FSQ, ENV, ENV-VIT/AWISSP-VIT and ENV-WIN/AWISSP-WIN Certificates.	Notes relating to the Crop/Produce. May offer alternative names for crops or provide guidance for its use.

## Category: Fresh Produce, Fresh Produce for Processing

**Fresh Produce** - Fresh produce supplied to the fresh market.

**Fresh Produce for Processing** - Fresh produce supplied to the processing sector. Does not include further processes such as freezing, drying, pickling, canning, cook-chill, juicing, slicing/shredding/coring, etc.

## FRUIT

## OTHER

Crop/Produce Group	Crop/Produce	Notes
<b>Arrowroot</b>	Arrowroot	<b>Arrowroot</b> refers to the <i>Canna edulis</i> tuber and is also known as Queensland Arrowroot
<b>Bushfood</b>	Bushfood - Flower Bushfood - Fruit Bushfood – Leaf Bushfood - Seed	<b>Bushfood - Flower</b> includes, but is not limited to: Rosella <b>Bushfood - Fruit</b> includes, but is not limited to: Davidson Plum, Quandong, Kakadu Plum <b>Bushfood - Leaf</b> includes, but is not limited to: Lemon Myrtle, Anise Myrtle, Saltbush <b>Bushfood – Seed</b> includes but is not limited to: wattle seed, mountain pepper
<b>Microgreens</b>	Microgreens Microgreens - Potted	<b>Microgreens</b> refer to young plants grown in a soil/growing medium and harvested after sprouting as shoots. This includes, but is not limited to: Wheatgrass, Snow Pea Sprouts and Tendrils, Vegetables <b>Microgreens - Potted</b> refer to live plants in a soil/growing medium.
<b>Stevia</b>	Stevia	<b>Stevia</b> refers to the <i>Stevia rebaudiana</i> plant
<b>Sugarcane</b>	Sugarcane	

## Category: Coffee

Coffee crop only. Does not include further processes such as drying, roasting, etc.

Crop/Produce Group	Crop/Produce	Notes
<b>Coffee</b>	Coffee	

## Category: Flowers and Foliage

Flowers and foliage destined for the fresh market. Includes edible flowers.

Crop/Produce Group	Crop/Produce	Notes
<b>Cut Flowers and Foliage</b>	Flowers - Australian Native Flowers - Orchids Flowers - Traditional Flowers - Tropical Foliage - Australian Native Foliage - Traditional Wild Flowers	<b>Wild Flowers</b> includes, but is not limited to: Australian Native and South African species
<b>Edible Flowers and Foliage</b>	Edible Flowers Edible Foliage	<b>Edible Flowers</b> includes, but is not limited to: Borage, Carnations, Cornflower, Calendula, Dandelions, Dianthus, Fuschia, Geranium, Lavender, Marigold, Nasturtium, Pelargonium, Snapdragons, Pansies, Rose (petals), Viola.

		<b>Edible Foliage</b> includes but is not limited to: Pandanus Leaf  For Zucchini Flowers see <i>Vegetables &gt; Fruiting Vegetables</i>
<b>Potted Flowers</b>	Potted Flowers	<b>Potted Flowers</b> includes, but is not limited to: Potted colours and Plants in pots already flowering.
<b>Tea Tree</b>	Tea Tree	

## Category: Fodder Crops

Fodder crops destined for use as animal feed.

<b>Crop/Produce Group</b>	<b>Crop/Produce</b>	<b>Notes</b>
<b>Fodder Crops</b>	Fodder Crops	<b>Fodder Crops</b> includes, but is not limited to: Maize (also known as Corn)

## Category: Nut in Shell

Nuts supplied as nut in shell (de-husked). Does not include further processes such as shelling, cracking, etc.

<b>Crop/Produce Group</b>	<b>Crop/Produce</b>	<b>Notes</b>
<b>Nut in Shell</b>	Almonds Cashew Nuts Chestnuts Hazelnuts Macadamia Nuts Pecans Pine Nuts Pistachios Walnuts	

## Category: Olives

Olive crop only. Does not include further processes such as brining or the production of olive oil.

<b>Crop/Produce Group</b>	<b>Crop/Produce</b>	<b>Notes</b>
<b>Olives</b>	Olives	

## Category: Reef Assured

Queensland Reef Protection Regulations compliance for Environmental Certification. Currently applicable to Banana Cultivation at February 2021.

## Category: Seedlings

For the production of seedlings.

<b>Crop/Produce Group</b>	<b>Crop/Produce</b>	<b>Notes</b>
<b>Seed Potatoes</b>	Seed Potatoes	

<b>Seedlings</b>	Seedlings	<b>Seedlings</b> includes, but is not limited to: Plug seedlings e.g. for hydroponic lettuce, broccoli
	Seedlings – Potted	<b>Seedlings - Potted</b> refers to live plants in a soil/growing medium that can bear fruit or other edible shoots for consumer use. Where it is Herbs – Herbs potted is to be used, and Microgreen- Microgreens – Potted is to be used.

## Category: Spices

Spice crop (fresh plant material) only. Does not include further processes such as drying, crushing, etc.

<b>Crop/Produce Group</b>	<b>Crop/Produce</b>	<b>Notes</b>
<b>Spices</b>	Nutmeg Saffron Turmeric Vanilla Bean	

## Category: Tea

Tea crop only. Does not include further processes such as drying.

<b>Crop/Produce Group</b>	<b>Crop/Produce</b>	<b>Notes</b>
<b>Tea</b>	Tea	

## Category: Wine Grapes

Category: Wine Grapes is applicable only to Freshcare Environmental/ Sustainability Viticulture and Winery memberships.

<b>Crop/Produce Group</b>	<b>Crop/Produce</b>	<b>Notes</b>
<b>Wine Grapes</b>	Wine Grapes	

## Track Changes

Date	Change
13 January 2020	<p><b>Scope: Activities</b> Definition of Broker has been updated.</p> <p><b>Scope: Categories</b> Definition of Spices has been updated.</p> <p><b>Vegetables</b> Broccoli - Sprouting added to Brassica Vegetables. Broccoli - Baby and Broccolini removed, covered under Broccoli - Sprouting. Noted that Cauliflower also refers to Broccoflower. Cauliflower - Sprouting added to Brassica Vegetables. Chard removed, covered under Silverbeet. Chicory has been separated into Chicory Leaves under Leafy Vegetables and Chicory Root under Root and Tuber Vegetables. Soybeans has been moved to Legumes.</p> <p><b>Seed and Oilseed</b> Seed and Oilseed added as Crop/Produce Group. Chia Seed and Quinoa removed as Crop/Produce Group, covered under Seed and Oilseed Buckwheat, Hemp Seed and Millet Seed has been added.</p>
29 March 2021	<p><b>Freshcare Standards:</b> Inclusion of AWISSP Programs to Environmental/ Sustainability, and where else applies through document.</p> <p><b>Environmental – Viticulture ENV-VIT</b> Now refer to Freshcare AWISSP – VIT1 Standard as well</p> <p><b>Environmental – Winery ENV-WIN</b> Now refer to Freshcare AWISSP – WIN1 Standard as well</p> <p><b>(New) Exclusion of Scope:</b> Inclusion of a note of the scopes of product/processing that are not covered by Freshcare Certification.</p> <p><b>Scope: Activities</b> – Fumigation added.</p> <p><b>Crops:</b></p> <p><b>Bushfood:</b></p> <p><b>Bushfood Fruit</b> – Notes include reference to Kakadu Plum</p> <p><b>Bushfood Seed</b> – inclusion: wattle seed, mountain pepper</p> <p><b>Edible Flowers - Renamed Edible Flowers and Foliage;</b> added Edible Foliage and Pandanas Leaf as an example.</p> <p><b>Herbs – Soft Leaf</b> – added Wasabi rocket</p> <p><b>Microgreens</b> – reference to Alfalfa sprouts removed – as this is an excluded crop, added Snow pea tendrils.</p> <p><b>Legumes</b> - inclusion of Carob.</p> <p><b>Seedlings</b> - Inclusion of Seedlings – Potted</p> <p><b>Reef Assured:</b> added category to allow certification against Environment for the Queensland Reef Protection regulations (<i>Queensland Environmental Protection Act 1994</i>).</p>
