

## Microbiological Testing Services

Agrifood Technology's scope for Microbiological Testing incorporates all common bacteria and pathogens. Our methods (AOAC, AS, ISO and AFNOR) are applied to and verified against the majority of food matrices and various water types. We are also accredited for environmental monitoring.

Matrices tested:

Cereal products	Vegetables & vegetable products
Nuts & nut products	Fruit & fruit products
Dairy products	Animal feeds
Meat, meat products - including poultry	Mixed foods
Eggs & egg products	Herbs & spices
Fish, crustaceans & molluscs	Pet foods
Sugar products, honey & confectionery	Poultry & poultry products
Beverages	Finished products

By offering this comprehensive range, we can help you identify which common organisms and foodborne pathogens may be present, therefore ensuring that your products meet the required quality standards.

In addition, for customers based in the metropolitan area, a sample pick up service can be arranged, providing you with convenience and peace of mind, as samples are transported directly into the laboratory.
