To Whom It May Concern

RE: NATA Accreditation

FreshTest[®] Australia is a program of Fresh Markets Australia (FMA) which is the organisation that represents the wholesalers operating in Australia's six central markets.

Independent facilitators located in each of the central markets conduct all sampling of the produce and the sampling process follows Codex Guidelines.

All laboratories used in the FreshTest[®] program have the relevant National Association of Testing Authorities (NATA) Accreditation for the chemical, microbial or heavy metal testing that is performed by that laboratory.

Laboratories used for residue analysis have current NATA Accreditation to ISO/IEC 17025 for the analysis of pesticide residues.
