

16 December 2022

Dear Freshcare Participating Business,

Neutrog Biological Fertilisers play a major role in the horticulture industry, working with growers of broadacre farming, vegetables, table and wine grapes, cut flowers and nursery plants, nationally and internationally.

Our products include organic and boosted fertilisers, bulk and specialty fertilisers, soil analysis, soil conditioners and biological liquids. Our services include specialist technical advice, including advice on which of the above products are suitable for our clients' needs.

Many Neutrog clients have implemented on-farm assurance programs such as Freshcare and as part of their compliance requirements, have requested that their suppliers of products and services fulfil specific requirements as an 'approved supplier'.

Many of Neutrog's products are both ACO and NOP accredited.

Neutrog has a qualified microbiologist and experienced sales team which provide continuous training and development to maintain high standards when providing dedicated technical service and advice.

This letter serves to demonstrate Neutrog's commitment to our clients in supporting their on-farm assurance programs. Our commitment is to maintain the highest standards possible when it comes to the products and services we supply, thereby supporting our clients to help meet the Freshcare specifications.

Best wishes,

Angus Irwin
Managing Director
