

ChemCert Storage Guide for Hazardous Chemicals

Chemical Shed 10 Point Guide

Hazardous Chemical Storage

Federal - Make sure all Agvet chemicals stored carry an APVMA approval number

EPA - Waste management – spills, chemical and container disposal – Chemclear and drumMuster

WHS - Keep a register of all hazardous chemicals and their current (less than 5 years old) safety data sheets (sds)

Larger quantities - placarding, manifests and notification

GHS Hazard class	GHS Hazard category	ADG Class/ Packing Group	Placard quantity	Placard to display	Manifest Quantity
Acute toxicity	1	6.1 PG 1	50 kg/L		500 kg or L
"	2	6.1 PG 11	250 Kg/L		2,500 Kg or L
"	3	6.1 PG 111	1,000 kg/L		10,000 Kg or L

As a general rule GHS flammable liquids, Skin corrosion and Oxidising liquids and solids require the same placard and manifest quantities as above but display their own respective placards.
